To be seen on the Grounds of the Citronelle Nursery & Orchard Company

Oil from these nuts is used in the manufacture of linoleum, flexible weather-proof films, insulation materials, cloth, linoleums, and numerous other industries.

The only source of supply is China and the United States. The cost of the sapote is approximately \$1000 per ton, or many millions of dollars world over year.

In experimental stage in past 11 years has been demonstrated that oil can be produced in the tropics as well as in the United States, and the facilities for manufacturing products better grade oil. This has been confirmed by the laboratories of the oil and varnish companies.

The large number planted by big mining companies is a tremendous indication of the success of this experiment and encouragement.

An extensive trial paper prepared by Agricultural Chemist and Professor on the oddity and usefulness has made survey of the Florida growth results as follows:

The results of the growth in acreage and production are as follows:
1911 year - \$25,000, fourth year - \$60,000, fifth year - \$100,000, sixth year - \$170,000, seventh year
and others - \$230,000.

(Signed) A. L. Valentine, Ph.D., Wiggin, Mississippi.

Four acres were planted 1000-7000 feet elevation. Some growth occurring before 1200 feet, but 1000 feet is the limit of the tree's growing range because of such early age. Below 1500 feet, the compound oil duty comes this does planting would be desirable.

There are several varieties of the Tung Tree, but the Almond Leaf is most common and good, and the Almond Leaf variety is the best desirable. Planting should be done to secure the individualized identity of 5000.

The Citronelle Nursery & Orchard Company will have for delivery after December 1st - 100,000 Tung trees of the Almond Leaf at prevailing prices.

The predictions for the coming season will be the largest in the history of the industry, and we stand ready to order early. Visit the Nursery and see for yourself the wonderful root and growth and how trees 500 to the tons come from 1 foot to 4 and 6 feet square, easily with a size of 18 to 20 feet, a width of 18 feet and 10 inches in circumference.
